

Sage 100 ERP

Inventory Management

Sage 100 ERP (formerly Sage ERP MAS 90 and 200) Inventory Management provides precise control and safeguarding of your inventory. Rely on timely and accurate inventory information from location and movement to valuation. Access accurate and meaningful information the way you want to see it on receipt of goods, movement of goods within or between locations, and the sale, removal, or other disposition of goods. Utilize kitting capabilities, lot and serial tracking, and the precise valuation and status of goods remaining in inventory at any point in time. Sage 100 ERP Inventory Management will be the cornerstone of your manufacturing and distribution operations.

Inaccurate inventory counts can cost you sales and delay shipments past the promise date. Out-of-stock items as well as overstocked items in inventory can be devastating to your business. Additionally, an overstated or understated inventory valuation can result in incorrectly reported assets within your financial statements.

Inventory Management offers comprehensive reporting capabilities to keep you on top of inventory status. Generate reports on item pricing, stock status, detailed sales history, backorder information, reorder points and recommendation, valuation, turnover, sales analysis, and much more. And adding the Business Alerts module can keep your staff on top of quantity changes to critical inventory items to keep stocking levels precisely where you want them. Properly used, the Inventory Management module can help bring about the formulation of new or improved purchasing policies, sales policies, pricing methods, and even enhanced customer service. Inventory Management could also provide your company with an additional edge over competitors that are unable to access the same strategic information.

BENEFITS

- Streamline workflow with dual grid data entry
- Manage multiple warehouses more efficiently
- Establish and utilize comprehensive pricing
- Accurately track inventory costs
- Reduce time spent conducting Physical Counts
- Increase productivity using batch entry
- Utilize up to 30 alphanumeric characters for smart part numbers
- Efficiently make Standard Cost Adjustments
- Accurately track \$0 samples or vendor overruns
- Pay commission rates by item
- Track warranty information
- Unlimited transaction history

The image shows two overlapping screenshots of the Sage 100 ERP interface. The background window is titled 'Physical Count Entry (ABX) 5/15/2010'. It displays a table with columns: Item Code, Bin Location, Lot/Serial, Quantity on Hand, and Quantity Counted. The table lists several items, including 8972, 8973, and 9264-1247-3547-ABCD-128345ABN. Below the table, there are fields for Description (Desk, Teak), Unit of Measure (EACH), Inventory Cycle, and Product Line (DSK). The foreground window is titled 'Transaction Entry (ABX) 5/15/2010'. It shows a 'Transaction Type' of Sales and a 'Batch' of 00002. It also displays a table with columns: Item Code, Quantity, Unit Price, and Extension. The table lists items 1, 2, 3, and 4, with item 3 highlighted. Below the table, there are fields for Description (Bookcase, 5 shelf), G/L Account (50600-01-000-000-000), Costing (Average), and Unit of Measure (EACH). At the bottom, it states 'On hand quantity in this warehouse is 135 EACH'.

- Manage your inventory more efficiently using upgrade-proof personalized screens, smart part numbers or item codes, and powerful physical count and restocking features.
