

# Sage 100 ERP

## Available Modules

Sage 100 ERP (formerly Sage ERP MAS 90, 200, and 200 SQL) business management software offers a broad range of modules designed to meet the many needs of virtually any business. Combine modules to build an ERP system optimized for your business, and the resulting integrated system will be more powerful than the individual components. As your business continues to grow, you can add Sage 100 ERP modules with confidence, knowing that your system is evolving and adapting as the best solution for your unique business needs. Go green with the powerful and efficient paperless office capabilities included with every system, and add specialized modules such as Direct Deposit\* and Federal and State eFiling and Reporting to further reduce paper and increase timeliness of communications. These business tools are just one of the reasons why Sage 100 ERP is recommended by more CPAs than any other midrange accounting solution.

Regardless of the platform you choose, and regardless of the deployment option, on-premises or online, there is a Sage 100 ERP system that can meet your requirements. Sage 100 Premium ERP\* provides a superior ERP solution with robust features and functionality and the efficiency of Microsoft® SQL Server®. Offering scalability, flexibility, integration, and reporting using SQL Server, Sage 100 Premium ERP leverages the ease of use, simplicity, and maturity of the Sage 100 ERP product line. Use the latest Windows® environments, the traditional local area network (LAN) and single-user environments, or wide area network (WAN) environments. The Internet- and intranet-compatible product line allows the flexibility to expand your system to accommodate greater numbers of users as your company grows, and provides more rapid transaction processing.

Sage 100 Advanced ERP is ideal for multisite businesses and requires no additional remote access software. Designed to deliver industry-leading, benchmarked performance for fast, reliable data throughput and optimized for TCP/IP, this dynamic solution and the thin-client architecture provide fast, reliable network connections.
