

Sage 500 ERP

Customization Tools

Your business is unique. Sage 500 ERP (formerly Sage ERP MAS 500) allows you to customize its entire system to match your specific needs. Powerful and flexible customization tools allow you to easily modify screens, business intelligence, and reports.

The customization tools also provide a foundation for integrating Sage 500 ERP with other applications, and for developing Microsoft®-based business applications for the SQL Server® environment that are compatible with Sage 500 ERP. With Source Code, you can tailor the entire Sage 500 ERP system to your unique business needs.

Unlike other systems that force you to change your processing to match the system, Sage 500 ERP gives you the flexibility to run your business the way you want to. Customizations can improve efficiency and boost productivity while maintaining data integrity.

BENEFITS

- Quickly and easily customize screens without modifying source code
- Easily get the information you need exactly the way you want it by customizing financial and operational reports
- Personalize business intelligence and key performance indicators to quickly get information that is most valuable to your business
- Extend your ERP solution by integrating data from custom applications and third-party systems
- Rapidly develop custom add-ons with the look and feel of Sage 500 ERP

- Powerful and flexible customization tools allow you to easily modify screens, business intelligence, reports, integrations, and system processing.
