- Recently viewed items
- Previous and next item
- Wish list
- Saved cart
- Mini cart
- Quick order
- Back-in-stock notification

SuiteCommerce Site Builder Add-Ons gives your SuiteCommerce Site Builder web store enhanced capabilities to drive customer engagement, loyalty and sales. Meet rising customer expectations for an interactive, personalised and socially oriented shopping experience with capabilities for product ratings and reviews, wish lists, streamlined ordering and more.

## Build Customer Engagement

- **Ratings and reviews.** Grow your online community, cultivate brand evangelists and improve sales with product ratings and review capabilities.
- **Wish list.** Give shoppers personalised wish list capabilities to keep track of those items they would love to purchase in the future for themselves or others.

## Deliver Rich Shopping Interactivity

- **Quick view.** Let shoppers quickly view product information and add to cart while looking at search results or a category page without having to drill down to the product page.
- **Image zoom.** Provide the ability for shoppers to get a more detailed view of a product.
- **Image gallery.** Give customers different views of your products to facilitate decision-making.

## Streamline Ordering and Purchasing

- **Mini cart.** Let shoppers quickly see all products that they have added to their cart by hovering over the cart icon.
- **Saved cart.** Give customers the ability to save previously selected items in their shopping cart so they can easily be purchased at a later time.
- **Quick order.** Enable your frequent buyers the ability to enter orders quickly without browsing for the items they want.
- **Back-in-stock notification.** Recapture sales and strengthen customer relationships by allowing customers to be notified when an out-of-stock item has become available for purchase.

## SUITECOMMERCE CUSTOMERS INCLUDE:

**KitchenwareDirect**  
Best Brands Best Prices

**WineMarket**
